

CLEARPOINT

FOR IMMEDIATE RELEASE: July 13th, 2007

**CLEARPOINT RACING EDITION™
HELPS RACERS AT SAIL NEWPORT REGATTA**

High Definition Weather Service Offers Competitive Edge

Newport, RI – ClearPoint is offering its High Definition Weather Edition™ and industry-leading ClearPoint Racing Edition™ global weather service to provide one kilometer wind data resolution weather information across the Newport race course for all competitive sailboat racers at this weekend’s Sail Newport Regatta.

“High definition weather information is the new way sailors will begin to interact with weather data,” said Stuart Johnstone, ClearPoint’s chief operating officer. “We’re showcasing the strategic advantage high definition weather provides global mariners at the Sail Newport Regatta – one of the United States’ most competitive sailing environments.”

“ClearPoint is designed for all sailors, from world-class sailboat racers like those here in Newport, to all types of recreational boaters, at an affordable price. The easy-to-use interface provides the most accurate and comprehensive global weather information for vital, even life-saving information, whether you are planning for a race or a day trip.”

ClearPoint High Definition Weather Edition

The ClearPoint High Definition Weather Edition tracks prevailing conditions for any location in the world, including detailed, “always on”, real-time and predictive data on key maritime applications such as winds, waves, fronts, sea temp, visibility, clouds, satellite, air temp, lightning, tropical storms, hurricanes, weather bulletins and alerts. ClearPoint weather services are good for any form of maritime or boating activity, as well as for specialist, land-based marina and resort weather-tracking applications.

ClearPoint Racing Edition

The Racing Edition is optimized for high-performance racing venues like the America’s Cup and is currently available at select racing locations.

In addition to the weather products provided in the High Definition Edition, the Racing Edition provides competitive sailboat racers with ultra-high resolution wind models at 1 kilometer, 5 kilometer and 15 kilometer resolutions in select locations.

Pricing Information

ClearPoint High Definition Weather’s flexible pricing is designed to make ClearPoint accessible to any recreational boater. New users pay a \$100 activation fee, \$295 per year for any 30 days in the year and \$10 per day thereafter for any additional days in that one year period. The Racing Edition also has a \$100 activation fee and is \$495 per year for any 30 days in the year and \$16.50 per day thereafter for any additional days in that one year period. For comprehensive subscription information, go to www.clearpointweather.com/subscribe.

Technical Information

ClearPoint High Definition Weather services can be downloaded over any Internet connection and launched onto any laptop, tablet, or other PC-based display devices or handheld computers. Real-time updates are fed automatically to these devices and all applications are integrated onto a single, easy-to use screen. ClearPoint's service is compatible with virtually any communications link, including satellite connections such as Iridium and Inmarsat for real-time detailed updates and alerts, anywhere on the high seas, or anywhere on earth.

About ClearPoint High Definition Weather

ClearPoint High Definition Weather is the world's most comprehensive and easy to use ultra-high resolution global weather information service for racers, sailors, fishermen and weather trackers, worldwide. ClearPoint offers real-time, accurate weather data for advanced weather decision-making. Headquartered in the Washington D.C. metropolitan area, TrueNorth Global Inc. launched its ClearPoint weather service in 2007. Additional information can be found on ClearPoint's website at www.clearpointweather.com.
